

THE COMPLETE SURVEY DATA MANAGEMENT SYSTEM

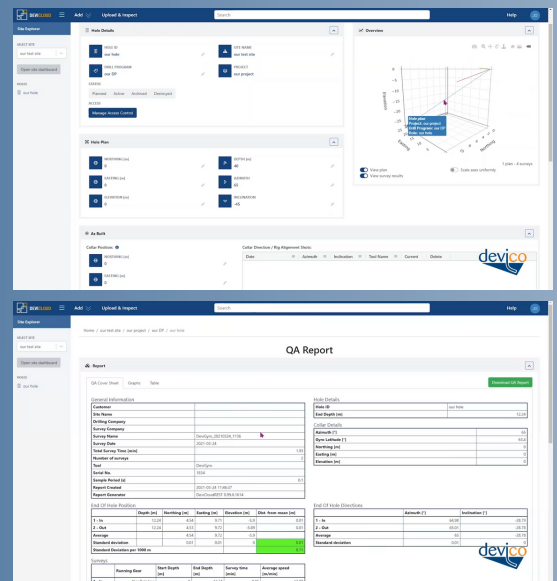

Connecting Drillers to Geologists and Engineers through a fast, secure and uncomplicated platform, the transfer and management of survey data is more streamlined than ever using DeviCloud. The cloud-based program provides your team with immediate access to surveys and limits the possibility for manual entry error through direct download to and from planned holes.

Featuring extensive plotting, reporting and processing capabilities, DeviCloud enhances the data transparency and quality of Devico's high precision instrumentation range to redefine QA standards across the globe.

- ❑ Sync directly to planned holes
- ❑ Increase accuracy with multiple run averaging
- ❑ Plot surveys across numerous parameters with 2D & 3D graphs
- ❑ Comprehensive QA reporting
- ❑ Controllable user permissions and editing rights
- ❑ Organise and archive completed drilling
- ❑ Fully encrypted security

"The DeviCloud addition has enabled us to move to a fully cloud-based system and has streamlined the way we manage drill data and survey information onsite. We are extremely pleased with the service and support provided."

Scott Carruthers - Senior Underground Geologist

TECHNICAL SPECIFICATIONS

DEVICLOUD PORTAL

SURVEY DATA CAPACITY	Infinite
PLOTTING	2D & 3D
COMMUNICATION	Two-way
TOOLS SUPPORTED	DeviAligner, DeviGyro, DeviFlex, DeviShot

PLATFORM

HOSTING PLATFORM	ISO27017 certified
LOGIN AUTHENTICATION	ISO27017 certified
SUPPORTED BROWSERS	Chrome, Safari, Edge, Firefox
USER ACCESS	Defined by admin user

Transparency. Security. Simplicity.

That's survey data managed with **DeviCloud**.
