Depth Counter™

Ensure survey accuracy with
precise depth control

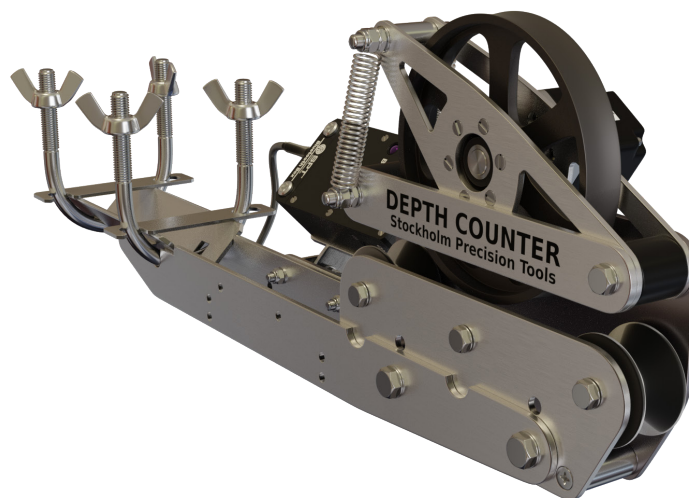

Lightweight, compact
and easy to use
measuring device

Depth Counter™

Technical specifications

Equipment		Performance	
Ingress protection	IP66	Accuracy	1/1000
Battery type	Li-Ion	Temperature	-20°C to 60°C (-4°F to 140°F)
Battery life	12 hours	Bluetooth® range	20m
Input encoder data	Pushpull, open drain, open collector		
Communication	Bluetooth/USB 2.0		

Compact and lightweight device for measuring wireline depth

The SPT *Optical Depth Counter* device is designed to be mounted to the rod of a drilling unit. One of the benefits compared to other measuring devices is that it measures depth on wireline cables from 4mm to 10mm (0.15" to 0.39"). This device will work on both open and cased hole, using a tripod or clamping device.

Dual spring-loaded measuring platform

This device measures the amount of wireline moving to and from the borehole. The measuring wheel is coupled to an encoder that transmit electrical signals via a cable to the Bluetooth® box and/or logging computer.

Long range wireless connection

The SPT *Optical Depth Counter* integrates perfectly into any SPT suite of mobile applications. Utilizing our long distance Bluetooth® connection of up to 20m, work can be performed safely in any environment. Information is automatically transferred and incorporated into the SPT logging software.
